FOREWORD

The purpose of this publication is to provide Federal Meat and Poultry Inspectors with a list of nonfood compounds authorized for use in federally inspected plants.

NOTICE

To all users...

This is a combined revision covering the period from April 1, 1974, through March 31, 1975. It is the first revision printed since changes in evaluation procedures became effective January 1, 1975; and it is also the first revision printed by means of our computerized data base. Since the printing is done directly from a computer tape, there are changes in the sequence of listing companies, and compounds within companies. See page xiv for directions on using the new list.

To Federal inspectors...

We urge Federal Inspectors to review the information presented on pages vi through viii indicating the types of compounds which may now be used without evaluation or authorization provided that they are used to the Inspector's satisfaction.

To firms having products listed...

We urge firms having products included in the List of Authorized Compounds, which begins on page xiv, to examine those listings for errors, omissions, or extraneous listings.

LIST OF CHEMICAL COMPOUNDS

AUTHORIZED FOR USE UNDER USDA MEAT, POULTRY, RABBIT, AND EGG PRODUCTS INSPECTION PROGRAMS

INTRODUCTION

This publication lists nonfood compounds authorized by Scientific Services, Animal and Plant Health Inspection Service for use in slaughtering and processing plants operating under the U. S. Department of Agriculture Poultry, Meat, Rabbit and Egg Products Inspection Programs. The publication also lists nonfood compounds authorized by the Grading Branch, Poultry Division, Agricultural Marketing Service for use on shell eggs.

The U. S. Department of Commerce, National Marine Fisheries Service recognizes this publication as an official list of nonfood compounds accepted for use in plants operating under the U. S. Department of Commerce Fishery Products Inspection Program.

THIS LIST IS EFFECTIVE AS OF APRIL 1, 1975

Compounds authorized by letters from the U. S. Department of Agriculture after issue of this publication are also acceptable.

A nonfood compound is defined as any agent proposed for use in a federally inspected plant but not intended as an ingredient of a meat, poultry, rabbit, or egg product.

Compounds Which Require Evaluation

Listed Compounds

Compounds classified in the categories described on pages viii through xiii of this publication require evaluation by USDA prior to use in plants operating under the USDA poultry, meat, rabbit, and egg products inspection programs. Letters indicating acceptability of the compounds are issued to suppliers by the Compound Evaluation Laboratory. Copies of the letters must be supplied to Federal inspectors as proof of authorization until the compounds appear in the subsequent revision of this publication. Once a compound appears in the publication, the letter is no longer valid as proof of authorization.

Unlisted Compounds

Paints, solvents, and some other types of nonfood compounds also require chemical acceptance by USDA, but are not categorized in this publication. Letters indicating continuing chemical acceptability are issued to suppliers by the Chemistry Staff. Copies of such letters must be supplied to Federal inspectors as proof of authorization at all times since the compounds cannot

be listed in this publication. Such letters remain valid as proof of authorization until revoked by USDA. The final granting of authorization to use such compounds which do not come in direct or indirect contact with edible products or packaging materials is the responsibility of the Inspector in Charge at the official plant. Technical assistance will be provided by the Chemistry Staff upon request.

Procedures For Obtaining Compound Authorization

1. Maintenance and cleaning chemicals; sanitizing and pesticide chemicals; food processing chemicals such as scald media, tripe processing compounds, and fruit and vegetable washing compounds; and structural or equipment coatings proposed for application on site in federally inspected plants.

Send requests for such evaluation to:

Compound Evaluation Laboratory
Scientific Services, APHIS
U.S. Department of Agriculture
Building 306, BARC-East
Beltsville, MD 20705
Telephone (301) 344-2566

All preparations to be evaluated by the Compound Evaluation Laboratory must be submitted using the appropriate application form. A description of the forms and their use is provided in Section 4.1 of the "Guidelines For Obtaining Authorization of Compounds To Be Used in Meat and Poultry Plants." Obtain copies of the "Guidelines" and blank forms from the Compound Evaluation Laboratory.

DO NOT USE THOSE FORMS FOR ANY PREPARATIONS OTHER THAN THOSE SUBMITTED TO THE COMPOUND EVALUATION LABORATORY.

2. Shell egg cleaning, defoaming, destaining, and sanitizing compounds (categories H,I,J,K,HH,JJ)

Although such compounds are included in the "List of Chemical Compounds," their evaluation is not the responsibility of the Compound Evaluation Laboratory.

Send all requests and inquiries concerning such compounds to:

Grading Branch
Poultry Division, AMS
U. S. Department of Agriculture
Washington, DC 20250
Telephone (202) 447-7510

Copies of authorization issued by the Grading Branch are sent to the Compound Evaluation Laboratory by AMS, and the compounds are subsequently inserted in the "List of Chemical Compounds."

3. Packaging materials, marking and branding inks, coatings applied to equipment or structural members prior to installation in the plant, and all materials such as metal alloys, plastics, belting, hose, etc., proposed for use in association with processing facilities and equipment.

Send requests for such evaluation to:

Compounds & Packaging Laboratory
Scientific Services, APHIS
U.S. Department of Agriculture
Washington, DC 20250
Telephone (202) 447-7680

4. Other chemicals proposed for use in meat and poultry plants.

Send requests or inquiries to:

Chief, Chemistry Staff
Scientific Services, APHIS
U.S. Department of Agriculture
Washington, DC 20250
Telephone (202) 447-7623

5. Chemicals or materials proposed for uses other than those previously specified.

The evaluation of such preparations is not the responsibility of APHIS, Scientific Services nor can it be performed by that group. Requests or inquiries concerning such evaluation should not be directed to the addresses given above.

Compounds Which Do Not Require Evaluation

The compounds referred to in this part may be used under the conditions described in the following paragraphs without being evaluated or authorized by USDA. Any such compounds which are classified as economic poisons must be registered with the Registration Division, Office of Pesticides Programs, Environmental Protection Agency, Washington, DC 20460, and must be used according to label directions. Any compounds governed by FDA regulations must be used in accordance with those regulations. All compounds must be used in a manner which, in the opinion of the Inspector in Charge, will not result in the direct or indirect contamination of food products.

1. Denaturants

Denaturants formulated and labeled according to the following subparagraphs require no authorization by USDA prior to their designated use.

Preparations consisting only of the substances listed below may be used for denaturing carcasses, parts thereof, meat and meat food products (other than rendered animal fat) condemned for pathology and intended for disposal only as tankage. The denaturant must be deposited in all portions of the carcass

or product to the extent necessary to prevent its use for food purposes. The container label must identify all ingredients present.

Crude carbolic acid
Cresylic disinfectant

A formula consisting of:
1 part FD&C Green No. 3,
40 parts oil of citronella,
40 parts liquid detergent,
and 40 parts water.

Preparations consisting only of the substances listed below may be used for denaturing carcasses, parts thereof, meat and meat food products intended for disposal for purposes other than human food. The denaturant must be deposited in all portions of the carcass or product to the extent necessary to prevent its use as human food. The container label must identify all ingredients present.

Charcoal (finely powdered)
FD&C Blue No. 1

FD&C Blue No. 2
FD&C Green No. 3

Preparations consisting only of substances listed below may be used for denaturing poultry and poultry products condemned for pathology and intended for disposal only as tankage. The denaturant must be deposited in all portions of the carcass or product to the extent necessary to prevent its use for food purposes. The container label must identify all ingredients present.

Crude carbolic acid
Fuel oil
Kerosene
Used crankcase oil

Phenolic disinfectants conforming
to commercial standards
CS 70-41 or CS 71-41

Preparations consisting only of substances listed below may be used for denaturing poultry and poultry products intended for disposal for purposes other than human food. The denaturant must be deposited in all portions of the carcass or product to the extent necessary to prevent its use as human food. The container label must identify all ingredients present.

FD&C Blue No. 1
FD&C Blue No. 2
FD&C Green No. 3

FD&C Red No. 2
FD&C Red No. 3
FD&C Red No. 40
Ultramarine Blue

Denaturants including ingredients other than those listed in the preceding paragraph, or those identified only by proprietary name, must be submitted for evaluation according to Section 1.1 of the "Guidelines For Obtaining Authorization of Compounds To Be Used in Meat and Poultry Plants," prior to use.

2. Outdoor pesticides

Compounds such as herbicides, bird control compounds, and other pesticides labeled for outdoor use only may be used around the premises of federally inspected plants without authorization by USDA, provided that they are registered by the Registration Division, Office of Pesticides Programs, Environmental

Protection Agency, Washington, DC 20460; and they are used in accordance with label directions and in a manner which prevents the direct or indirect contamination of food products.

3. Compounds used in offices and other similar nonprocessing areas

Compounds such as dusting aids, furniture waxes or polishes, wall or floor finishes or waxes, rug or upholstery shampoos or cleaners, rug anti-static treatments, window or glass cleaners, and other similar compounds specifically designated by the Compound Evaluation Laboratory require no authorization by USDA prior to use in such areas. They may not be used in any processing area of a federally inspected plant.

4. Compounds used in cafeterias or other retail food services areas

Compounds such as rinse additives to prevent spotting and streaking of dishes and utensils, utensil tarnish removers, some hand dishwashing soaps or detergents, and other similar compounds specifically designated by the Compound Evaluation Laboratory require no authorization by USDA prior to use in those areas. They may not be used in any processing area of a federally inspected plant.

5. Compounds used in heating systems

Compounds such as fuel additives, firebox or flue treatments or cleaners, and other similar compounds specifically designated by the Compound Evaluation Laboratory require no authorization by USDA prior to their proposed use.

6. Compounds used in holding pens

Compounds such as pesticides or disinfectants used in the area or on animals in the area, chemicals for deodorizing or dissolving animal waste, compounds for general cleaning or maintenance of the area, or other similar compounds specifically designated by the Compound Evaluation Laboratory.

Compounds Which Are Not Applicable For Evaluation

None of the compounds referred to in this part may be used in a processing area of the plant. However, they may be used under the conditions described in the following paragraphs without being evaluated or authorized by USDA. They may be stored within the plant provided that such storage is in a designated nonprocessing area acceptable to the Inspector in Charge. Any such compounds which are classified as economic poisons must be registered with the Registration Division, Office of Pesticides Programs, Environmental Protection Agency, Washington, DC 20460, and must be used according to label directions. Any compounds governed by Food and Drug Administration regulations must be used in accordance with those regulations. All compounds must be used in a manner which, in the opinion of the Inspector in Charge, will not result in the direct or indirect contamination of food products.

1. Compounds used in sewage or waste water systems outside of the plant

Compounds such as grease solvents for traps or lines, sewage odor control compounds to maintain biological balance in sewage lagoons or holding ponds, or other similar compounds specifically designated by the Compound Evaluation Laboratory.

2. Compounds used in cooling towers or evaporative condensers

Compounds such as corrosion inhibitors, algaecides, compounds for cleaning or maintaining the tower or condenser, or other similar compounds specifically designated by the Compound Evaluation Laboratory.

3. Compounds used on the exterior of buildings or immediate surrounding areas

Compounds such as exterior coatings; mortar cleaning or etching compounds; tar, asphalt, or mortar removers; driveway patching or finishing compounds; or other similar compounds specifically designated by the Compound Evaluation Laboratory

4. Compounds used for cleaning or maintenance of the exterior of vehicles

Compounds such as car washes or shampoos, tire cleaners, truck body brighteners, or other similar compounds specifically designated by the Compound Evaluation Laboratory

Category Code Letters And Their Meanings

The permissible use for each authorized compound is designated by the following code letters, and conditions for use are restricted by the category in which it is placed.

A. Compounds for use as general cleaning agents on all surfaces, or for use with steam or mechanical cleaning devices in all departments.

Before using these compounds, food products and packaging materials must be removed from the room or carefully protected. After using these compounds, surfaces must be thoroughly rinsed with potable water.

B. Compounds for use only in soak tanks or with steam or mechanical cleaning devices in all departments.

Before using these compounds, food products and packaging materials must be removed from the room or carefully protected. After using these compounds, all surfaces in the area must be thoroughly rinsed with potable water.

C. Acid cleaners for use in all departments.

Before using these compounds, food products and packaging materials must be removed from the room or carefully protected. After using these compounds, all surfaces in the area must be thoroughly rinsed with potable water.

D. Floor and wall cleaners for use in all departments.

Before using these compounds, food products and packaging materials must be removed from the room or carefully protected. After using these compounds, all surfaces in the area must be thoroughly rinsed with potable water.

E. Scouring cleaners.

Residues resulting from the use of scouring cleaners must be carefully removed from surfaces by thorough rinsing with potable water.

F. Sanitizers, disinfectants and sanitizing cleaners for all surfaces.

Before using these compounds, food products and packaging materials must be removed from the room or carefully protected. After using these compounds, surfaces must be thoroughly rinsed with potable water before operations are resumed. Such compounds must be used according to applicable label directions.

G. Sanitizing solutions for all surfaces.

Before using these compounds, food products and packaging materials must be removed from the room or carefully protected. A potable water rinse is not required following the use of these compounds on food contact surfaces in official meat, poultry, rabbit, or egg processing establishments provided that the surfaces are adequately drained before contact with food so that little or no residue remains which can adulterate or have a deleterious effect on edible products. Such compounds must be used according to applicable label directions.

H. Shell-egg cleaning compounds.

Eggs that have been washed with these compounds shall be immediately subjected to a thorough potable water rinse.

I. Shell-egg destaining compounds.

Eggs that have been washed with these compounds shall be immediately subjected to a thorough potable water rinse.

J. Shell-egg sanitizing compounds.

Eggs that have been treated with these compounds shall be subjected to a thorough potable water rinse only if they are to be immediately broken for use in the manufacture of egg products.

K. Shell-egg sanitizing compounds.

Eggs that have been treated with these compounds may be broken for use in the manufacture of egg products without a prior potable water rinse.

L. Wetting agents for use in poultry scald vats.

Compounds used for this purpose may not alter the water retentive properties of poultry products being processed.

M. Compounds for treating boilers or steam lines where the steam produced may contact edible products and/or cooling systems where the treated water may not contact edible products.

In compounds containing volatile amines, the amine in the steam may not exceed the indicated concentration.

Cyclohexylamine	10 ppm	Morpholine	10 ppm
Octadecylamine	3 ppm	Hydrazine	0 ppm
Diethylaminoethanol	15 ppm		

N. Compounds for treating boilers, steam lines, and/or cooling systems where neither the treated water nor the steam produced may contact edible products.

O. Compounds for use in sewage and/or drain lines.

P. Compounds for use in toilets and/or dressing rooms.

Q. Handwashing compounds.

The compounds must be dispensed from adequate dispensers located a sufficient distance from the processing line to prevent accidental product contamination. After the use of the compounds, the hands must be thoroughly rinsed with potable water.

R. Compounds for use on all surfaces in inedible product processing areas, nonprocessing areas, and/or exterior areas.

These compounds must not be used to mask odors resulting from insanitary conditions. They must be used in a manner which prevents penetration of any characteristic odor or fragrance into edible product areas. Compounds containing isomers of dichlorobenzene, or other substances toxic by inhalation, may be used only in areas where there is adequate ventilation to prevent accumulation of hazardous vapors.

Permission for the use of these compounds on loading docks and other similar areas is left to the discretion of the Inspectors in Charge of the plants.

S. Pesticides for use in all departments.

These compounds must be used in accordance with the conditions for nonresidual insecticides set forth in Section 8.48 of the Meat and Poultry Inspection Manual

T. Pesticides for use in inedible product areas only.

These compounds must be used in a manner that prevents their entry into edible product areas through open windows, ventilating systems, etc.

U. Pesticides for controlled use only.

Compounds listed in this category are to be used in accordance with the conditions for rodenticides and fumigants set forth in Sections 8.48 and 8.49 of the Meat and Poultry Inspection Manual.

V. Compounds for washing fruits and vegetables that are to become ingredients of poultry, meat, rabbit and egg products.

After using these compounds, the products must be thoroughly rinsed with potable water.

W. Hand creams, lotions and cleaners.

The use of such compounds is limited to toilets and dressing rooms. Employees who handle edible products may use the compounds only when leaving the plant.

X. Hog scald media.

Compounds must be labeled in accordance with Section 318.1 (d) of the Meat Inspection Regulations.

Y. Tripe denuding, bleaching, and neutralizing agents.

Treatment must be followed by thorough rinsing with potable water to remove added substances. Compounds must be labeled in accordance with Section 318.1 (d) of the Meat Inspection Regulations.

Z. Potable water treatment compounds.

Compounds used in such treatment should not remain in the water in concentrations greater than required by good practice. Compounds containing substances which may subsequently result in the adulteration or contamination of meat or poultry products may not be introduced into the system. Specific limitations on substances are as follows:

The concentration of phosphates may not exceed 10 parts per million calculated as phosphate ion.

The concentration of silicates may not exceed 10 parts per million calculated as silicon dioxide.

Chlorine may be present in process water of meat plants at concentrations up to 5 parts per million calculated as available chlorine. Chlorine may be used in process water of poultry plants at levels acceptable to plant management, recognizing the self-limiting factors of effect on product, corrosion of equipment, and acceptability by plant personnel. Plant management must notify the Inspector in Charge when the chlorine level is increased above 20 parts per million. Chlorine must be dispensed at a constant and uniform level and the method or system must be such that a controlled rate is maintained.

Cooling and retort water treatment compounds must be labeled in accordance with Section 318.1 (d) of the Meat Inspection Regulations. Unless a limitation is stated on the label, the amount used should be the minimum sufficient for the purpose.

AA. Lubricants with incidental contact.

These compounds may be used as a lubricant, release agent, or anti-rust film on equipment and machine parts in locations in which there is exposure of the lubricated part to edible products. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping as required to leave the surface effectively free of any substance which could be transferred to food being processed.

BB. Lubricants with no contact.

These compounds may be used as a lubricant, release agent, or anti-rust film on equipment and machine parts in locations in which there is no possibility of the lubricant or lubricated part contacting edible products.

CC. Laundry compounds.

Laundry detergents, bleaches, and sours may be used on fabric which contacts meat or poultry products, directly or indirectly, provided that the fabric is thoroughly rinsed with potable water at the end of the laundering operation.

DD. Denaturants.

Denaturants for carcasses, parts thereof, meat and meat food products (other than rendered animal fat) condemned for pathology and intended for disposal only as tankage. The denaturant must be deposited in all portions of the carcass or product to the extent necessary to prevent its use for food purposes.

EE. Denaturants.

Denaturants for carcasses, parts thereof, meat and meat food products intended for disposal for purposes other than human food. The denaturant must be deposited in all portions of the carcass or product to the extent necessary to prevent its use for human food.

FF. Handwashing and sanitizing compounds.

The compounds must be dispensed from adequate dispensers located a sufficient distance from the processing line to prevent accidental product contamination. The hands need not be washed prior to the use of the compounds. After the use of the compounds, the hands must be thoroughly rinsed with potable water.

GG. Hand sanitizing compounds.

The hands must be washed and thoroughly rinsed prior to sanitizing with the compound. The hands need not be rinsed following the use of the compound.

HH. Foam control compounds.

These compounds may be used to control foam in egg washing machines. Eggs washed in water containing these compounds shall be immediately subject to a thorough potable water rinse.

JJ. Shell egg sanitizing compounds.

Freshly washed eggs may be sanitized with these compounds only if the eggs are rinsed prior to application of the compound. A subsequent rinse is not required.

KK. Denaturants.

Denaturants for poultry carcasses, parts thereof, or poultry products condemned for pathology and intended for disposal only as tankage. The denaturant must be deposited in all portions of the carcass or product to the extent necessary to prevent its use for food purposes.

LL. Denaturants.

Denaturants for poultry carcasses, parts thereof, or poultry products intended for disposal for purposes other than human food. The denaturant must be deposited in all portions of the carcass or products to the extent necessary to prevent its use for food purposes.

MM. Absorbents or anti-slip agents for spot application to floors.

Such compounds may be used in all areas provided that, use is limited to the portion of the floor area where the hazard exists, and that such use does not result in dusting, tracking, or other objectionable conditions. Compounds may not be used as a substitute for good sanitation. They must be removed as a part of the routine floor cleaning operation.

NOTE:

In several categories, reference is made to the need for rinsing with potable water. USDA accepts water used in federally inspected plants as being potable when such certification is made by state health agency authorities.

How To Use The New List

The sequence of listing companies, and compounds within companies, as printed by the computer is as follows:

Compounds, or companies, having a special character (e.g., #, %, ") as the first character are printed before any compound, or company, having an alphabetic character (e.g., a, b, c) as the first character. For instance, under the heading of Abbott Supply Company, #777 Bottle Washing Compound is listed before Abbott Concentrated Lymee.

Compounds, or companies, having a numeric character (e.g., 1, 2, 3) as the first character are printed after all compounds, or companies, having an alphabetic character as the first character. For instance, under the heading of All-Chem Corporation, 709 All Purpose Cleaner is listed as the last product for that company. As another example, the listing for the company named 2-Cleen Chemical Laboratories, immediately follows the listing for Zurn Industries, Inc.

Please examine all listings carefully before concluding that a compound, or company, is not listed.

List of Authorized Compounds

In the following list, compounds are arranged alphabetically by trade name under the heading of the firm by which they are marketed.
